WE DEVELOP INSIGHTFUL SOFTWARE

SELINSOFTWARE.COM

We provide innovative software solutions to companies worldwide from our headquarters, located in the Buenos Aires Technology District, Parque Patricios, City of Buenos Aires, Argentina.

Our company was born out of ICS Red's experience and strength, with the goal of generating knowledge and digital developments based on emerging technologies.

We connect talent with opportunity.

Our nearshoring team provides high quality services for clients in Americas.

---

## ABOUT US

We specialize in:

### Product Design

We help you solve problems by working with your team to support your business strategy.

### Staff Augmentation

By providing you with our most qualified professionals, your IT team will achieve your business objectives.

### Mobile Apps

Our know-how includes the development of digital channels, always focusing on the user experience. By leveraging modern architectures, we develop on cloud platforms supported by partners like Azure.

### Corporate Software

As experts in data survey, IT development, integration, testing and application support, we collaborate with our clients on custom software development, aiming to meet their business demands.

## **Software Development**

We guide our clients through the entire process of digital transformation, by assisting in the management of requirements and project planning.

Our team of developers can supplement our clients and build a unique, responsible and aligned team.

## **Integration and consultancy**

Selin offers consulting services to companies requiring a survey of new functionalities and sizing for core systems. For those clients who need help with the integration of platforms and new systems affecting their business core, we can offer our team of specialists, capable of connecting functions, data bases and the accurate information flow among them.

## **WHAT WE OFFER**

### **Testing and support**

Certified QA teams provide testing services to clients managing a high volume of software generation.

System maintenance is performed by engineers properly trained to solve problems and contact users.

### **Blockbuilder**

A WMF mobile app is a program designed as a solution for team management. It allows users to send photos and information in real time, update the state of a previously assigned task, geolocate displacements, and document events or tasks.

The web app allows customers to configure service orders, states, languages, and workflows for an efficient management of field teams.

Working with distributed teams, Blockbuilder is a partner for managing the execution of projects, network maintenance, logistics operations, sales campaigns and other activities.
